

GB-FEED ADDITIVE

is a high quality bentonite-based feed additive designed to improve digestion and overall animal health. The product provides toxin binding, improves nutrient absorption and increases feed efficiency, which contributes to increased animal performance. It is ideal for use in feeding cattle, pigs, poultry and other farm animals.

PRODUCT BENEFITS

Binding of toxins

Reduces the risk of poisoning by neutralising harmful substances in the animal's body.

Improves digestion

Promotes better absorption of nutrients and optimises metabolism.

Increased productivity

It has a positive effect on the growth, development and health of animals, which increases the overall efficiency of the farm.

Environmental safety

Does not contain any harmful components, making it safe for the environment and animal health.

PACKAGING AND DELIVERY

GB-Feed Additive is supplied in 25kg bags or 1 tonne big bags. Delivery options are available throughout Europe and for export.

PROFESSIONAL TECHNICAL SUPPORT

We are ready to provide comprehensive support for all questions regarding the use of GB-Feed Additive on your farm. Contact us for detailed recommendations and technical documentation.

PRODUCT PROPERTIES

Parameter	Unit	Value
Montmorillonite	%	65 - 85
Moisture (%)	%	10 - 14
Fraction	mm	0,1 - 5,0
Free swelling index, min	mm/2g	25
Volume of filtrate, max	ml	18
pH	%	10
Methylene blue adsorption coefficient, min	mg/g	400
Water absorption, min	%	600
