

# GB-SOIL

is a bentonite additive for improving soil properties. The product increases soil fertility, promotes moisture retention and improves soil structure, creating optimal conditions for plant growth and development. It is ideal for use in agriculture, horticulture and viticulture.

## PRODUCT BENEFITS

### Improves soil structure

Increases the soil's moisture retention capacity by promoting even moisture and aeration.

### Increase of fertility

Optimises conditions for root development and nutrient uptake by plants.

### Erosion reduction

Reduces the risk of soil erosion while maintaining soil stability and integrity.

### Environmental safety

Does not contain any harmful components, making it safe for the environment and animal health.

## PACKAGING AND DELIVERY

GB-Soil Enhancer is supplied in 25kg bags or 1 tonne big bags for easy transport and storage.

## PROFESSIONAL TECHNICAL SUPPORT

We provide full technical support and advice on how to use GB-Soil Enhancer to improve the soil on your farm. Contact us for more information and technical documentation.

## PRODUCT PROPERTIES

Parameter	Unit	Value
Montmorillonite	%	65 - 85
Moisture	%	10 - 14
Fraction	mm	0,1 - 5,0
Free swelling index, min	mm/2g	25
Volume of filtrate, max	ml	18
pH	ml	10
Methylene blue adsorption coefficient, min	mg/g	400
Water absorption, min	%	600
